The bold box within the table below represents what will be displayed on the TNG Portal website when you display the "MOF Minor Timber Harvesting Form."   The next column identifies whether or not the answer is required to be part of the shapefile, and the column on the far left identifies the field name that should contain the answer.

Form Name: Field Trip Photo Loading.

Question:	Text box or checkbox where the "answer" would go.	Information part of shapefile?	**Shapefile Field (if applicable)**
Field Trip Destination		N	
Field Trip Companions*		N	
Field Trip Date		N	
Project		N	

* If this is not you, and you wish the field trip companions to be notified of related submissions please include the email address of the individual listed here on the email notification page for this submission.

** It is very important that all shapefiles are submitted to the portal as amendments, and have the proper DBID attribute filled in based on the parent submission ID reported back to the submitter once the form (above) is completed.

Photo/GPS Schema

Schema Name: gps_photo_fieldsheet_points

Point Shapefile

Field Name	Field Type	Length	Precision	Description
WAYPT_ID	Integer	10		Way Point ID Number
PHOTO_ID	Integer	10		Photo ID Number

The Stewardship Portal requires that all shapefiles submitted meet specific formatting requirements, known as schemas, which have already been established. If you're having trouble uploading shapefiles to the portal, please view the schema requirements for the data-type you're trying to upload.

Select the schema you wish to view from the list below.

Schema | gps_photo_fieldsheet_points ▼

Geometry Type | point

Attributes

- waypt_id, double precision
- photo_id, double precision
- northing, double precision
- easting, double precision
- azimuth, double precision
- waypt_desc, varchar
- photo_desc, varchar
- photo_name, varchar
- url, varchar
- x_albers, double precision
- y_albers, double precision

Please note: "varchar" = "text" or "string". Lengths of text fields are irrelevant to the portal's database.

Also remember that each component of the shapefiles needs to be uploaded separately, not in a zipfile. You need to add the .shp, .dbf, .shx, (and others) to the portal as individual files.

If you feel additional schemas need to be made or modified, please contact the portal administrator to discuss the issue.
