## Forestry Referral Form 2011-Sept-15

The original Forestry Form was reworked in September 2011 to take advantage of new field types, new nodes, and to do away with under-utilized Community checkboxes.

Available Nodes	Page it will appear on the Notification Form, and rank
Parent Submission ID Node	1-1
Content Node	1-2
File Attachments Node	1-3
Load Shape Files Node	1-4
Priority / Scheduling / Ranking Node	Not Present
Next Page Node	Not Present
Set Permissions on Submission Node	1-5
Send Notification Emails Node	1-6
Submission Control Settings Node	1-7

The bold box within the table below represents what will be displayed on the TNG Portal website when you display the "Forestry Referral Form 2011-Sept-15."   The column on the far right identifies whether or not the answer is required to be part of the shapefile, and the column on the far left identifies the field type that was used to build the form. *Examine field types carefully to ensure you're not trying to type text into a Numeric field*.

Form Name: Forestry Referral Form 2011-Sept-15.

Type of Field	Question:	Text box or where the "answer" would go.	Shapefile Field (if applicable)
Textbox	Licensee/Forest Company Name		*LIC_CODE*

At left is the content node for the Forestry Referral Form-2011-Sept-15.

Sept 2011 – Please note that some of the fields have been changed and are now restricted to only receive dates, or numbers, and some can handle formatted text!

* If you are not the Primary licensee contact, please add his/her email in the **email notification node** for this submission.

** **NOTE** ** It is very important that all shapefiles are submitted to the portal with the proper DBID attribute filled in based on the parent submission ID.

The steps to generate attributed shape files are:

1. Start filling the form, take note of the DBID / Submission ID at the top of the page
2. Complete the form fields, and save the content.
3. Hold the submission in Draft.
4. Complete the shape file attributes including DBID.
5. Return to the Portal and go Fill a form – Resume Draft.
6. Upload your shape files, ensure everything else required is also attached, then Submit the completed form to the Portal.

Forestry Block Schema

1-Schema Name: forestry_blocks

Polygon Shapefile

| Field Name	Field Type	Length	Precision	Description
LIC_CODE	String	50		Licensee/Company Name
LICENSENUM	String	10		License Number
AMENDNUM	String	15		FSP Amendment Number
CP_NUM	String	15		Cutting Permit Number
BLOCK_NUM	String	15		Block Number
YEAR	Integer	4		Proposed Year For Harvesting
DBID	Integer	10		Portal Submission ID Number

Forestry Road Schema

2-Schema Name: forestry_rds

Line Shapefile (Use same form for roads and blocks)

Field Name	Field Type	Length	Description
IDENTIFIER	String	50	Road Permit, Amendment #, Section # or portion thereof
LENGTH	Double Precision	15	Length of road referred (Number)
DBID	Integer	10	Parent Sub ID #

Schema details are viewable on the form as its being completed. **Expand** the "Spatial Schema Definitions" instructions on the Load Shape Files node to see what type of shapefiles the form can accept.

Each schema is also viewable on the "**View Available Schemas**" tab in the Portal's main menu at left.

DBid	Lic_code	Licensenum	Amendnum	Cp_num	Block_num	Year
4693	Tolko Industries Ltd.	A20018	2	19W	WG0030	2011
4693	Tolko Industries Ltd.	A20018	2	19W	WG0031	2011
4693	Tolko Industries Ltd.	A20018		19W	WTP	2011

An example of a correctly attributed shapefile for the forestry_block schema. Note that each row represents a unique feature in the polygon shapefile, and the DBid is filled in.
